To identify the discriminations against a girl child

Aim

To identify the discriminations against a girl child (if any) in your family/area and find justifications for the same.

Introduction

The girl child in India faces a difficult life. She is discriminated against right from birth. She is given the feeling of unwantedness, uncared for and an inferior being in many families.

There are girls in most of the families, and if not try to find out in your nearby areas, if they are discriminated. Also find out the justification for the same. Collect data for 5 girls.
